

THREE PROVINCES SUFFER LOSSES: RAIN IS NEEDED

At One Place Nearly 800,000 Feet
Of Sawn Lumber Are
Destroyed

Amherst, N.S. June 11.—(Bulletin)—Cumbrian country forest fires in the river Hebert and river Philip districts are continuing with unabated fury today. A shift in the wind yesterday swept the flames in a new direction, totally destroying nearly 800,000 feet of sawn lumber and several thousand oak logs. Today the fire was reported to be progressing toward lumber holdings in the woods between McCann and River Hebert. Every measure is being taken to check the consuming scourge but it is impossible to do anything in the face of the strong gale which has been persisting for several days now. Rain is the only salvation for the timber holdings in the districts threatened.

N.B. Town Threatened
Fredericton, N.B. June 11.—McGiverny, a junction point, where the Canadian Eastern and trans-continental of the Canadian National railways cross in the north-east of York county has been threatened with destruction by a forest fire which broke out yesterday afternoon. However, the wind suddenly changed, causing the fire to work in a different direction. Approximately 150 acres of wood land had been burned over up to last night, according to reports received this morning. This morning an additional crew of men were rushed to McGiverny, as with a heavy wind developing here, the situation was regarded as a critical one, but it was believed the fire, which was still burning, could be kept under control.

Catholic Church Burned.
Charlottetown, P.E.I. June 11.—Bush fires which are raging in the eastern part of King's county yesterday, destroyed the Roman Catholic church at St. Margaret's, residence of the pastor, Rev. K. C. McPherson, and the outbuildings and the dwelling of Mr. Feehan, opposite the church. The total loss will approximate \$30,000, partly covered by insurance. The church was valued at from \$20,000 to \$25,000. The fires are being fanned, today, by a strong westerly wind and large quantities of timber are being destroyed.

FRESH VEGETABLES BIG FEATURE AT RICE ST. MARKET

Fresh vegetables were a distinct feature at the Rice street market Saturday morning. Radishes, rhubarb and lettuce were offered in fairly large quantities and were among sellers. Cucumbers and asparagus were also offered in small quantities and were finding a ready market. Radishes were selling at from 50 per bunch to two bunches for 10c; rhubarb was offered at 7 1/2 lbs. per pound, onions at 50 per bunch, and lettuce at three bunches for 25c. Asparagus sold at 40c per bunch. At this price the demand was very good and it was all sold out before noon. Cucumbers were selling at from 25c to 30c per pound.

Vegetable plants such as cabbage, cauliflower, and tomatoes were also offered in fairly large quantities and were in good demand. Cabbage plants were offered at 15c per dozen, cauliflower plants at 10c per dozen, and tomato plants at 10c per dozen. Several dealers were offering a wide range of seedling plants at prices ranging from 40c to 50c per dozen. Butter and eggs were very good. Butters were in fair demand in small quantities at from 50c to 60c per pound. Carrots, beans and turnips were offered at 20c per pound but the demand was only fair. Butter and eggs were offered in large quantities by fifteen or twenty dealers and although there was a slight tendency for a reduction in prices during the week, the market was just a little firmer. Dairy butter was selling at 15c per pound and at this price the demand was good. Eggs were selling at from 25c to 30c per dozen.

TWO RECEIVED BROKEN LEGS AT CIRCUS GROUNDS

A team of horses ran away at the circus grounds Saturday night and Hugh Murphy who resides at 2523 165th street and M. E. Paffenbarger, 16522 24th street who were in their tent each a broken leg. The men were removed to the Royal Alexandra hospital in Andrews Brothers ambulance.

- 1 Pill a Laxative,
- 2 Pills a Cathartic,
- 3 Pills a Purgative,

This is the Way Milburn's Laxative Pills Work.

You will never see any of the old griping, nagging, sickening, purging pills, containing as they do calomel and other drastic mineral ingredients, once you use Milburn's Laxative Pills, a pill that is purely vegetable. Owing to the great care used in procuring the highest grade of drugs from which they are manufactured, they are as near perfect as it is possible to get a laxative remedy.

They work gently and effectively, without a gripe or pain. If you are troubled with constipation, biliousness, driven to distraction with sick headaches, if your tongue is coated, your breath bad, your complexion muddy, your eyes yellow, have floating specks before the eyes, jaundice, itching, bleeding or protruding piles, stir up your sluggish liver with a few doses of Milburn's Laxative Pills.

Mrs. Roy Mackie, Orillia, Ont., writes: "I desire to express many thanks for the relief I have had by using Milburn's Laxative Pills. I had been suffering for some time from constipation and had headaches. I tried all sorts of cures, which did me no good, until I was advised to try your pills. I got great relief after taking only a few doses."

Price 25c a trial at all dealers or direct from the manufacturer, The T. Milburn Co., Limited, Toronto, Ont.

FOUR PARTIES ARE OPERATING IN MACKENZIE DIST.

Messrs. Dowling, Hume Williams and Whittaker Are the Engineers in Charge

The geological survey has sent four field parties to investigate further the oil and other mineral resources of the Mackenzie river region. The parties are in charge of Dr. D. B. Dowling, Dr. G. E. Hume, Dr. M. T. Williams and Mr. E. J. Whittaker. Dr. Dowling will be in charge of a detailed examination of the Mackenzie and field parties of the Mackenzie river in the Fort Norman district, where oil was obtained in August by the Imperial Oil company, and where much additional drilling will be done this year. He will follow closely the results of drilling in order that this information may be applied to advantage in the similar underground exploration which is likely to be undertaken in other parts of the Mackenzie basin.

Dr. Williams, Dr. Hume and Mr. Whittaker will begin systematic mapping and study of the geological formations on each side of the Mackenzie between Great Slave lake and Fort Norman, with a view to supplying maps and information regarding the depth and form of the oil-bearing rock formations. As the Mackenzie river is the great highway through the region, it seems most likely that future prospecting operations will extend southward along it.

Dr. Williams and Dr. Hume will jointly explore the country on either side of the Mackenzie from Fort Simpson downstream. Mr. Whittaker will devote his attention chiefly to the section from Great Slave lake downstream. The Topographical Survey Branch of the Department of the Interior will cooperate in this work by making a careful survey of the Mackenzie river from Great Slave lake down stream, controlled at intervals of about 150 miles by astronomical stations.

PLAN FOR OPENING FISHING SEASON ON JULY 15 NEXT

Various Points Along Lesser Slave Lake and Lac La Biche Show Activity

According to reports received by the Edmonton Dunvegan and British Columbia railway, preparations are now in full swing at the various shipping points along the line on the Lesser Slave lake and at Lac La Biche for the opening of the summer fishing season and operators are now busy overhauling their outfit and getting ready for the opening day July 15th.

One million five hundred thousand pounds of white fish and any quantity of lake fish and pike will be the limit of the season catch allowed for all the fishermen participating in the water of the Lesser Slave lake and Lac La Biche. The fishing season is now open and the quantity of white fish and any quantity of lake fish and pike is unlimited.

Of the total limit of the catch no allowance is made to the various operators the year, but permits will be given to them to fish the lake, catch as much as they wish, with the limit has been reached. It is estimated that fifty per cent. of the Edmonton Dunvegan and British Columbia railway catch will be taken out of the lake at Ft. Smith, and the balance at the various shipping points on the Lesser Slave lake. These generally rely about seventy per cent. of the catch of white fish and pike as a result of their operations. Twenty cars are sufficient to haul the produce from Lac La Biche.

According to present information it is expected that fully fifty per cent. of the whitefish caught north of this city will be sent direct to markets in Chicago. The fishing season will close on September 15th.

Police Court

In the city police court Saturday morning C. B. Smith pleaded guilty to the charge of being in illegal possession of liquor and was fined \$10 and assessed the costs of the case.

Fred Thompson pleaded guilty to the charge of exceeding the speed limit and was fined \$5 and the costs. Edmund Coleman and James Kinnison were arraigned on the charge of purchasing and had their case adjourned till Monday. The lady was alleged to have broken into the City Park store and to have stolen a quantity of cigars and confectionery.

It doesn't help much to beat one's head into a wall unless one can beat one's head into a wall.

"Help us Kids"

Suppose
Nobody
Cared?

EDMONTON Children's Aid Society

Will call upon you this week

To ask your help and co-operation to build a home for children. For several years past they have taken care of forty to fifty children of Edmonton and District whose parents through death or other misfortune had to temporarily break up their home.

The present quarters are the old Immigration Hall on the South Side, an old weather beaten frame building, lacking practically all the modern facilities for keeping the children healthy and happy.

Think of it, a family of over forty children from two to ten years of age, and only one bath tub, lack of modern laundry room, no proper provision for preventing the spread of and caring for the many minor diseases of children.

Under these trying conditions wonderful service has been rendered through the motherly love of the matron and her devoted staff.

Do not confuse this with the shelter maintained by the Provincial Government which takes charge of orphans and others who for various reasons permanent homes must be found.

The whole idea underlying the Children's Aid Home is to preserve the sacred ties of family life and prevent brothers and sisters from being separated.

the children being restored to their parents as soon as they are ready to care for them again.

There is no restriction as to race, color, or creed, each child attending his or her own church, and the public or separate schools as the case may be.

All are children, and as such, this appeal must strike a responsive chord in every heart.

Many Edmonton citizens have personally investigated conditions in the home and have come to the conclusion that if the people of our city and district are acquainted with the facts, they will be willing to make a moderate sacrifice to right this wrong.

Take the time and trouble to personally call and acquaint yourself with the need, then you will be ready to take your part in this community service.

LET US PULL TOGETHER, DO THIS JOB AND DO IT RIGHT.

More than One-third of the required amount
